

# VEHICLE TRACKING

Vehicle Theft and Hijacking has been identified as one of the most problematic type of Insurance Claims happening in the country. Insurers are relying on tracking devices to lessen the frequency and severity of theft/hijacking claims. NB: Insurers have made tracking device installation in vehicles, and the maintenance thereof a requirement to enjoy cover for theft and hijacking for specific vehicles or vehicles over a certain value. Each insurer prescribes what types of vehicles must have tracking devices and in some cases more than one tracking device.

Please carefully read the below and ensure you have the correct device/s installed as one or more of your vehicles may be subject to these requirements.

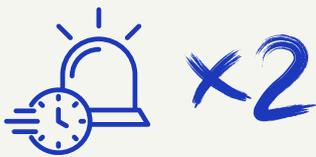

## SANTAM VEHICLE TRACKING REQUIREMENTS

The mandatory installation of one tracking device is required for the following vehicles:

- Toyota Etios (irrespective of year manufacture)
- Nissan NP 200 (irrespective of year manufacture)

The mandatory installation of two tracking devices is required for the following very high-risk vehicles:

- All Toyota Fortuner's (irrespective of year manufacture)
- Toyota HiLux Double Cabs (New models from 2016 and onwards)
- Toyota HiLux Extended Cabs (New models from 2016 and onwards)
- Toyota HiLux Double Cabs (2010 to 2016)
- Toyota HiLux Extended Cabs (2010 to 2016)
- Toyota Prado (2018 and onwards)
- Lexus Cruiser (2017 and onwards)
- Toyota Land Cruiser (2017 and onwards)

In the case of the single device, we guarantee a minimum discount of R54 and for; the double device a minimum of R79, which is the cost of the devices.
