

VEHICLE TRACKING

Vehicle Theft and Hijacking has been identified as one of the most problematic type of Insurance Claims happening in the country. Insurers are relying on tracking devices to lessen the frequency and severity of theft/hijacking claims. NB: Insurers have made tracking device installation in vehicles, and the maintenance thereof a requirement to enjoy cover for theft and hijacking for specific vehicles or vehicles over a certain value. Each insurer prescribes what types of vehicles must have tracking devices and in some cases more than one tracking device.

Please carefully read the below and ensure you have the correct device/s installed as one or more of your vehicles may be subject to these requirements.

OLD MUTUAL INSURE VEHICLE TRACKING REQUIREMENTS

Tracking device must be fitted into the following vehicles: (note - devices must be automatically activated, linked to a 24 hour monitoring centre, linked to armed response vehicles) - Early Warning

- Ford Ranger
- Toyota Hilux
- Toyota Fortuner
- Toyota Land Cruiser
- Toyota Prado
- Toyota Etios
- Nissan NP200
- Sum Insured over R750 000

Please note no matter how old the vehicle is, the requirement is based on the vehicle make.
