

Destiny Passive Market Enhanced Portfolio

September 2021

Investment strategy

The investment strategy is to maximise the allocation of investment receipts towards retirement funding investments and to objectively select and manage the allocation to asset classes through mainly passive indices on its members' behalf to maximise investment returns at an appropriate level of risk.

Investment portfolio mandate

This investment portfolio is aimed at income and capital growth. The allocation to asset classes is achieved by investing mainly in a combination of passive indices. The equity component will be larger than the bond and cash components. The portfolio, however, should be less volatile than the market as a whole. The portfolio is managed in compliance with Prudential Investment Guidelines as well as being comprehensively managed to comply with the limits of Annexure A to Regulation 28 of the Pension Funds Act.
